FAT Jointing Cabinet, small, NCD 518 8002

Fiber Access Terminal

Data Sheet

Features

- IP45 Indoor, Wall mount
- 96 fibers / 48 microducts
- 8 multiduct / 8 cable inlets
- Lockable door
- Front serviced

Application

This small sized cabinet is intended for fiber splicing and termination of up to 48 micro-ducts (subscribers). This is appropriate for example when changing from distributed Ribbonet® Air Blown Fiber to fiber optical cables, or to other ducts for further fiber blowing. The supplied fiber organizers can easily handle 96 fibers (typically), see table below for capacity details. The cabinet is also excellent for jointing cables to cables indoor.

Design

The cabinet is designed for indoor use according to IP 45 but can be fitted conveniently in outdoor enclosures. It is designed for wall mounting. Cable / duct entrances are supplied with rubber gaskets. The cabinet is painted in coral white color and delivered with microduct and fiber organizers, fiber labels and 2 keys to the lockable doors.

There are two additional sizes of cabinets within this Joining Cabinet family: NCD 518 8004 "medium" with up to 96 micro ducts (subscribers) and NCD 518 8003 "large" up to 192 micr ducts (see separate data sheets).
