Fiber Termination Box FTTD, NEG 204 5970

For FTTD applications

Data Sheet

Fiber Termination Box for FTTD
This fiber outlet is intended for the termination of optical single- or multi-mode fiber in Fiber-To-The-Desk (FTTD) applications using fixed trunk networks (Thorsman).

The outlet fits, by a spacer block, into a separate fiber protective casing (accessory) that is to be mounted in the cable trunk. The casing contains snap in holders for the Ribbonet® microducts.

A selection of mounting plate panels for different connector standards (SC duplex and MT-RJ) is available. Matching adaptors are also available as accessories.

The basic kit includes the spacer block, cover and label with transparent window.

Fiber Termination Box for FTTD

Product no	Size	Weight	Color
